

# Survey Searching Guide

**September 2023**

**Version 11**

KNet# 8194268

**Government of  
South Australia**

### Scope

This document provides surveyors with a brief description of various sources of land survey information in South Australia. It contains details about the location of original records; it is not intended as a Manual for the searching systems.

Amendments may be made to this document without notification of the updates.

Any corrections or suggested additions can be forwarded to [DTI.OfficeSurveyorGeneral@sa.gov.au](mailto:DTI.OfficeSurveyorGeneral@sa.gov.au)

## Section 1 Plan Images available in *SAILIS*

This section details the plan types that are available in the [South Australian Integrated Land Information System \(SAILIS\)](#). Plan images can be viewed online or downloaded as PDF or TIFF files.

Some plan types listed below do not have a full set of images in *SAILIS*. In these cases, a list of the plan numbers that are available is given.

The following original records have been archived by State Records:

- Dealings 1 – 362,091
- Survey Office Diagram Books
- Imperial and metric titles

See the State Records Research Centre [website](#) for opening hours and details on ordering and viewing original records.

Other original records are stored by Land Services SA (LSSA) and can be ordered in *SAILIS* and viewed on level 9, 101 Grenfell Street, Adelaide, open from 9am to 5pm, Monday to Friday; turnaround time for orders is 72 hours.

Additional search information may be available by visiting LSSA customer support, also on level 9.

### Deposited Plans

All Deposited Plans (DPs) are available in *SAILIS*, including plans being examined prior to their deposit. 'Board' copies of DPs up to 9818 are stored with LSSA at their Netley repository. The manual plan journal for DPs below 22585 have been archived with State Records.

The originals of completed plans lodged manually prior to Electronic Plan Lodgement (EPL) are stored at the Netley facility. Uncompleted plan originals prior to EPL are stored with LSSA at their Grenfell St office.

### Community Plans

All Community Plans are available in *SAILIS*, including plans being examined prior to deposit.

The originals of the completed plans lodged manually prior to EPL are stored at the Netley facility. Uncompleted plan originals prior to EPL are stored with LSSA at their Grenfell St office.

### Filed Plans

All Filed Plans (FPs), including ULPI (Unique Land Parcel Identification), numbered 100,000 onward, are available in *SAILIS*. Plans being examined prior to being accepted for filing are also available. If the plan cannot be found in *SAILIS*, LSSA have manual journals for FPs below 25800.

The originals of the completed plans (less than 100,000) lodged manually prior to EPL are stored at the Netley facility. Uncompleted plan originals prior to EPL are stored with LSSA at their Grenfell St office.

### Strata Plans

All Strata Plans are available in *SAILIS*.

The originals of the completed plans are stored at the Netley facility. Uncompleted plan originals are stored with LSSA at their Grenfell St office.

### GRO Plans

Most of the GRO Plans from 1978 onwards that contain useful land parcel data should be available in *SAILIS*. Most plans that include an aerial photo (i.e. Heritage and Forestry plans) are not available in *SAILIS*.

GRO Plans prior to 1978 and some of the Forestry plans have been added to *SAILIS* as requested. If the plan is not in *SAILIS*, it can be ordered in *SAILIS* or through LSSA customer support. See [Contact details](#).

The originals of GRO plans prior to 1978 are stored with LSSA. See LSSA [Contact details](#). The remainder are stored at the Netley facility except for the recent year plans and some large colour plans, which are with LSSA; they have a set of manual journals.

GRO Plans 520 - 612/1979 were transferred to Births Deaths and Marriages Registration Division.

### LTO A, B & C Plans

LTO A, B & C are available in *SAILIS*, except for a small number of unaccepted plans. Copies of unaccepted plans can be ordered in *SAILIS* or through LSSA customer support. See [Contact details](#).

These plans are associated with search references (e.g. X search) and either dockets, applications or documents; these records are linked in *SAILIS* through the cross reference facility.

The originals of the completed plans are stored at the Netley facility.

A paper print of the plan is usually found in the associated document.

### Tube Plans

Tube Plans are available in *SAILIS*, except for a small number of unaccepted plans. Copies of unaccepted plans can be ordered in *SAILIS* or through LSSA customer support. See [Contact details](#)

References to Tube Plans in the *Survey Mark Search* are prefixed with 'B' (e.g. Tube plan 25 is shown as B25).

These plans are associated with search references (e.g. X search) and either dockets, applications or documents; these records are linked in *SAILIS* through the cross reference facility.

The originals of the completed plans are stored at the Netley facility.

A paper print of the plan is usually found in the associated document.

### Road Plans

All Road Plan (RP) images are available in *SAILIS* together with a cross reference system between the Road Plan (RP or LTO Tracing) number and the earlier Council name and number system that existed prior to the merger of the functions of the Registrar-General and Surveyor-General into one department.

The originals of Road Plans below 4500 are rolled paper plans mounted on linen. They are with State Records (Reference GRS 6867/1). There are also copies of the earlier Road Plans made by the LTO on linen and filed as 'Road Tracings' at the Netley Repository.

Road Plans above 4500 were drafted on linen and film and are filed in 'Verti-Plan' cabinets at the Netley facility. A set of mounted copies of these plans were used to note mergers etc. and then microfilmed for public use (available for viewing through LSSA customer support, see [Contact details](#)). Most of the mounted copies have been destroyed. Backup microfilm aperture cards are filed with the Roads Unit. See [Contact](#)

[details](#).

The road plans finalised over the years 1849 to 1990 were indexed as RP1 to RP 9097. In 1988 the Common Plan Format was introduced with road plans lodged as Deposited Plans starting at DP 22349. The Roads (Opening and Closing) Act 1932 was repealed and replaced by the Roads (Opening and Closing) Act 1991. Plans lodged under the new Act commenced with DP 34032.

Information on the disposition of closed roads can be found in Road Orders associated with each plan. The Roads Unit (see [Contact details](#)) keeps scanned images of Road Orders and a database covering later disposals of closed roads. Gazettal dates (i.e. the date of the Government Gazette notice often shown on the [Public Maps](#) and also shown on the plan as the confirmation date) are also recorded in this database. This information is also available through Survey Operations, see [Contact details](#).

Preliminary Road Plans (P Plans) contain no survey information are not available in *SAILIS*. They can be viewed on the [Roads Opening & Closing Proposal webpage](#) or inspected at Council Offices.

### PM Tracings

These are plans showing the location of Permanent Survey Marks.

PM Tracings 1861 onwards are available on *SAILIS*.

See [Section 4 – Permanent Survey Mark \(PSM\) Records](#) for more information.

### Rack Plans

Rack Plans are used to graphically define larger areas and are often referred to in Government Gazette notices for definition purposes. The name is derived from the fact that they were filed vertically in a rack. Most are compiled and rarely contain survey data. Many of the historical Rack Plans from 1 to 548 have been previously archived or destroyed.

The following Rack Plans are available in *SAILIS*:

426/C, 426/H, 426/J to P, 554/C, 558, 559/1, 559/2, 559/B, 588/1 to 5, 561, 561/A, 561/C, 561/D, 573, 578, 590, 598/1A to 29B, 608, 612, 614/1A to 29A, 619/1 to 8, 623, 628/1 to 15B, 629/17 to 29, 633/1 to 4, 644/20, 644/31 to 38, 664, 669, 686 and 701.  
(Rack Plan 426/P is accessible as sheet 2 of 426/O)

The originals are filed with the plots.

The remaining Rack Plans (rolled) are with State Records (reference GRS 6908/1). The later ones are filed in 'Verti-Plan' cabinets at the Netley facility.

All enquiries should be directed through LSSA customer support, see [Contact details](#), where staff have access to a book listing the contents of each plan.

### Drawer Plans

Drawer plans are shown on the plan details search with a U prefix.

These were Lands Department plans for various purposes that were filed in large drawers in the old 'strongroom' in the Treasury Building. Most of the other Drawer Plans do not contain any survey data, but are withdrawn Hundred Plans. All enquiries should be directed through LSSA customer support, see [Contact details](#) where books listing the contents of each plan are stored.

The following Drawer Plans are available in *SAILIS*:

29/1A, 29/1B, 29/2A, 29/2B, 29/3A to 29/3C, 29/4A, 29/4B, 29/5 to 8, 29/9A, 29/9B, 29/10, 29/12A to 12C, 29/13 to 15, 29/17, 36/3, 36/49, 50/52, 72/1 to 66, 114/8, 115/1, 136/1 to 46, 137/1 to 174, 180/4, 180/4A, 180/8, 180/9, 180/10, 180/11, 180/15 to 18,

180/20, 180/22, 180/25, 186/ 1 to 12, 186A/1 to 7 and 388/A to X.

Some Drawer 17 plans are available in *SAILIS* for Hundreds Mingbool to Yatala, referenced as 17/1 to 17/76. The others were converted to PM tracings. (Drawer 17 was reserved for Diagram Book Pages that were never proceeded with.)

The following Drawer Plans that are referenced in the *Survey Mark Search* were looked for in March 2000, but not located: 29/16, 29/43, 115/10, 141/4, 141/8.

Microfilm copies of plans from the following Drawers are available on request from the Information Counter: 1 to 8, 10, 12 to 15, 18, 19, 21, 22, 24, 27, 28, 30, 32, 36, 38, 53, 59, 64, 71, 78, 103, 104, 142, 145 and 150; the originals are archived by State Records (reference GRS 6910/1/P). The Drawer Plans have been scanned in colour and in time will be available on *SAILIS*. The Survey Operations has copies of scanned Drawer plans. See [Contact details](#).

### Parliamentary Plans

These are mostly proposal plans prepared for Parliament with no useful land parcel data. Only Parliamentary Plan 313 is available in *SAILIS*.

The originals have been archived by State Records (reference GRS 6912/1/P). All enquiries should be directed to LSSA customer support, where an index book for these plans is kept. See [Contact details](#).

### SD Docket Plans

References to these plans are found through a Plan Details enquiry on the *Survey Mark Search*. Only references to SD1 are actual 'Replacement of Permanent Marks' plans with data, while the others are just notes that the Permanent Survey Mark has been located, see [Dockets \(Lands Department\), Survey Division \(SD\) Dockets](#) for more information.

Example Reference: SD1P35

The SD1 plans are available in *SAILIS* (i.e. select *SD Docket Plans* and enter *1P35* as the plan reference for the example above).

The remaining docket plans are stored with LSSA. A list is available through Survey Operations. See [Contact details](#).

### DR Docket Plans

References to these plans are commonly found through a Plan Details enquiry on the *Survey Mark Search*. Some refer to actual plans of 'Replacement of Permanent Marks', while the others contain notes about marks.

Example reference: DR1/69P43

Plans contained in the following list of docket plans are available in *SAILIS* (i.e. select *DR Docket Plans* and enter *1/69P43* as the plan reference for the example above):

DR 123/54

DR 234/57P1 only

DR 55/63

DR88/63

DR 158/66

DR 215/67

DR 1/68

DR 1/69

DR 1/70

DR 3/71

DR 1/72

DR 1/73

Also, see [Lands Department Dockets](#) for information about other DR dockets.

### PSM Locality Plans

Also known as Survey Mark (SM) Locality Plans, these are sketches showing the physical location of Permanent Survey Marks (PSMs) and are available in *SAILIS* free of charge; originals have been destroyed. The images are found using the mark number in the following format PSM 6628/12345 is searched as 662812345.

See [Section 4 – Permanent Survey Mark \(PSM\) Records](#) for more information.

All enquiries should be directed to Survey Operations. See [Contact details](#).

### Survey Graphic Index

The *Survey Graphic Index* is a series of maps (mostly standard 1:2500 series) covering the built up areas of the state, annotated with numbers representing survey plans. The reverse side of the map (sheet 2 of plan image) contains plan references, or in some cases a Search, Document, Docket or Application, listed alongside the number. The data was originally derived from the survey examination search sheets and was maintained up to the lodging of Deposited Plan 65000 and Filed Plan 46000.

Images of these maps are available free of charge in *SAILIS* using the standard map reference (with upper case letter) e.g. 662710B.

Microfilm copies of the *Survey Graphic Index* are available in the LSSA customer support area. See [Contact details](#).

### Plots

These were an earlier form of *Survey Graphic Index* used for areas where the density of surveys was too much to use Section numbers as the index key. The *Plots* are no longer updated with new survey references, but Public Road declarations are still being electronically added. The *Plots* also contain lists of original title references and Application numbers (i.e. The Application to bring land under the Real Property Act).

Images of *Plots* are available in *SAILIS* free of charge. Microfilm copies are available in the LSSA customer support area. See [Contact details](#). The original records are archived as 'Diagram Plot Maps' by State Records (Reference GRS 10921/1).

### Diagram Book Pages

These are large bound books containing survey plans, indexed as pages within Hundreds and unique book names. These surveys cover the subdivision of the state into Hundreds and Sections under the Crown Lands Act. Since November 1987, crown land surveys have been lodged as Deposited and Filed plans. Scanned images of all of the Diagram Book Pages are in *SAILIS* except for some 'shack site' plans that contain aerial photographs.

Original Diagram Books can be ordered through State Records (See [Contact details](#)) using the code GRS 12200. In order to preserve the original records, some pages were removed from the books and replaced by copies. Where the original page is required it can be re-ordered through State Records quoting the code GRS 12203 for the original page removed from the book.

The mounted copies of the large pages, together with all of the original tracings, are stored at the Netley facility. The shack site aerial photograph Pages (e.g. Ridley Page 140A which relates to Ridley Page 140) are located in a 'Verti-Plan' cabinet located at Netley.

*Survey Mark Search* shows references to the pages using Diagram Book Codes,

constructed mostly from historical (LOTS system) codes for each Hundred. See [Diagram Book Codes](#) for more information.

The Section index in the front of each book has been entered into *SAILIS* as part of the search facility. The first index page, usually referring to reserves, Government Towns etc., has been scanned as page 1I (upper case letter required) for each Hundred. The indices to Mineral Sections Claims (indexed as Page V1P1I) and Hundred Boundaries surveys can also be viewed as multiple sheets of page 1I for these books.

Mineral Section Claims that are referenced by a Mineral Section (MS) number only and do not contain a volume and page can be cross referenced using the MS number and the Mineral Section Claim Hundred index page (Page V1P1I).

The Section or 'Public' map for most Hundreds prior to re-identification as other parcel types is available as page 1M (upper case letter required).

On rare occasions you may find a reference to 'Originals Books'. These are a set of 7 books that appear to contain clean copies of Diagram Book pages; they are filed with the tracings at the Netley facility. See [Originals Books](#) for more information.

### **Crown Survey and Pastoral Field Books**

Some Field Books (FB) & Pastoral field books referenced on Crown land surveys are available free of charge in *SAILIS*. The original books are filed with Survey Operations. High quality scanned images of the pages are available via email from Survey Operations. See [Contact details](#).

See [Section 3 Historic Lands Department Records – Field Books](#) for more information.

### **Property Books**

These historical LTO records consist of a set of Hundred and Township books, a Subdivisions Book and a RPA Applications book; images of the books are available in *SAILIS*.

The Hundred and Township books list the first title (and Application number where applicable) issued for Sections in Hundreds and Allotments in Government Towns. The Subdivisions Book provides references to plans of subdivision (e.g. Deposited and GRO Plans) and title references for all named subdivisions. The RPA Applications book lists titles issued from Applications to bring land under the Real Property Act. These records also contain cross-referencing to Plots.

Originals are stored in the Historical Records Filing Cabinet in the LSSA customer support area. See [Contact details](#).

## Section 2      Historic LTO References

This Section details records associated with freehold land that were kept by the Lands Titles Office (LTO).

Prior to the use of Plan Lodgement Forms, all accepted plans were associated with a document of some kind. E.g.:

- transfer document
- re-subdivision docket
- application to bring land under the Real Property Act

Around 1940, those plans that were certified by a Licensed Surveyor were also allocated search references as part of the examination process. Until the early 1960's, the plans were physically filed in the relevant document, but the majority have since been removed and indexed as LTO A, B or C plans.

The cross reference function in *SAILIS* links the plan reference with the search and document. In some cases but more particularly with applications and transfer documents, the survey plan may still be filed in the original document.

All survey plans lodged were noted in manual journals, on plots and in the [Hundred & Town books](#).

### Applications

Some Applications to bring land under the Real Property Act contain surveys.

An Application number can be checked for a survey plan reference using the cross reference function in *SAILIS*. LSSA have a list of all the application numbers that are known to contain surveys. See [Contact details](#).

Note that Applications under *Part 7A* of the *Real Property Act* use a different numbering system.

All Applications to bring land under the *Real Property Act* are filed with LSSA. See [Contact details](#). If an application contains a survey that is not on *SAILIS*, it should be forwarded to LSSA for scanning and inclusion on *SAILIS*.

### GRO Enrolled Plans

GRO Enrolled Plans are documents held by the LSSA. See [Contact details](#). The plans are contained in Enrolment Books, with a book and page number.

All Old System records are name based, unlike Real Property records which are based on land descriptions.

There are two sets of books containing alphabetic listings of names:

- An Enrolment book index (digital) that provides a brief description of the registered transaction, a date and a reference to either an Enrolment Book and Page or a GRO Deposit or Plan (these are distinguished from the Enrolment references by 4 digit years instead of 2 digit page numbers)
- A Memorial Book Index that provides a reference to a GRO Memorial. The GRO Memorials are on microfilm cartridges and are referenced by book and page

This information is available through LSSA customer support, see [Contact details](#)

### Hundred and Town Books

These records were used as the source data for both the [Survey Graphic Index](#) and part of the *SAILIS* search database ('Govt Town' in Diagram Book Pages search). The books contain a list of surveys for Sections in Hundreds and Allotments in Government Towns. Most of the survey references are search references.

The books can be accessed through LSSA customer support, see [Contact details](#).

### LTO Dockets

All surveys in dockets up to 1940 have been removed and given file numbers. The originals for dockets after this (mainly outer boundary surveys for subdivisions) may still be filed in the docket, but there should be a search reference that can be viewed. Check the docket number in *SAILIS*, to see if a survey plan reference exists. If no record is found in *SAILIS*, the docket can be ordered in *SAILIS* or through LSSA customer support, see [Contact details](#).

If the docket contains a survey plan, it should be forwarded to LSSA (See [Contact details](#)) so the plan can be added to *SAILIS*.

### Property Books

See [Section 1 Plan Images available in SAILIS](#) for more information.

### Provisional Plans

Provisional Plans were paper copies of new surveys, provided by surveyors prior to official lodgement, to notify searchers of a pending survey and marks placed in an area; they were deleted when the actual survey was lodged.

Provisional plans that have not been superseded by registered surveys have been indexed as Rack Plans.

These plans should not be confused with Preliminary Plans, lodged as part of the Road Plan approval process. Preliminary Plans are allocated a docket number e.g. PP32/356, whereas Provisional Plans were issued with sequential numbers e.g. PP1234.

### RPA Search

These are the search packets associated with Limited Titles. All enquiries should be directed through LSSA customer support, see [Contact details](#).

### Searches

These are work sheets (prints of surveys) used by the survey examiners in LSSA to check the plan. They contain cross-references to earlier surveys as well as data comparisons.

There are 6 series:

- Ordinary Searches (OS) (early outer boundary plans)
- X Searches
- L searches (similar to information purposes plans)
- C Searches (Commonwealth surveys)
- Deposited Plan (DP) searches (DP 12001 to DP 30931)
- Filed Plan (FP) searches (FP 18174 to FP 30751)

DPs and FPs later than the numbers shown above, where boundary definition problems

have been identified have a small cross or star in the Plan Approved box, indicating that the work sheet had been kept; most of these work sheets have now been destroyed.

Scanned images of the 6 search series above are available from Survey Operations. See [Contact details](#).

### Search Books

These books contain diagrams of data compiled on request, usually in areas where survey issues have been discovered; they have been archived with State Records. See [Contact details](#).

See [Section 3 – Historic Lands Department Records](#) for other search book references.

### Town Planning Books

These books were used to store diagrams of re-subdivisions prior to the Docket system. References to individual diagrams contain a book number and page number e.g. TP Book 35, Page 19.

These books have been archived with State Records. See [Contact details](#).

### Registered Documents

Transfers are the documents most likely to contain surveys. You should first check the number using the Cross-Reference option on *SAILIS*, to see if a survey plan reference exists. LSSA has a list of document numbers that are known to contain surveys. See [Contact details](#).

The Transfer numbers can usually be found by a historic search of titles. The only way to be sure if a transfer contains a survey is to view it. In some cases it becomes evident where data has changed on the title that issued from the transfer, when compared to the original title.

Documents can be ordered in *SAILIS* or through LSSA customer support. See [Contact details](#). If the document contains a survey, it should be forwarded to LSSA, so that the plan can be added to *SAILIS*.

Documents 1 to 362,091 have been archived by State Records (GRS 12537/1/P); other documents are filed at the Netley facility.

## Section 3 Historic Lands Department Records

This section details records associated with Crown land and originally kept by the Lands Department; most have been sent to State Records for archiving.

Many of these references are found in notes on [Diagram Book Pages](#).

### Alignment Plans

These were plans of the alignment of streets usually initiated by local Councils. The following lists of official and unofficial alignments were taken from an index book kept in the Lands Department:

City of Adelaide Official Alignment	Plan / Search / Comment
City of Adelaide	Rack 561 A & 578
North, South, East & West Terraces (PMs only)	Act 1715/1925, Plot 230
Selby St (TA 399 & 462) Also showing TA 397-400 & 461 – 464)	Rack 426 O, GRO 35/1928
Register St	X2235, L <sup>r</sup> 286/1953, GRO 283/1953
Gawler Place (Pirie St to Flinders St) TA 205, 206, 233, 234	X2022, GRO 394/1952
Gawler Place (Rundle St to Grenfell St) TA 81, 82, 105, 106	X2013, GRO 394/1952
Gawler Place (Grenfell St to Pirie St) TA 143,144,167,168	X1989, GRO 394/1952
Gawler Place (Nth Terrace to Rundle St)	X1967, GRO 394/1952
Gawler Place (Flinders St to Wakefield St) TA 270,271,301,302	X2086, L <sup>r</sup> 1412/1952, GRO 132/1953
Field St	X1868, L <sup>r</sup> 1259/1952, L <sup>r</sup> 1818/1952 (Filed in GRO 345/1952)
Ackland St (Pirie St to Grenfell St)	X1596, L <sup>r</sup> 647/1951, GRO 249/1951
Ackland St (Flinders St to Pirie St)	X1644, L <sup>r</sup> 1133/1951, GRO 248/1951
Ackland St (Flinders St to Wakefield St)	X1614, L <sup>r</sup> 868/1951, GRO 247/1951
Elizabeth St	X1519, GRO 122/1951
California St	X1513,GRO 60/1952
Fenn Place	X1503, L <sup>r</sup> 3268/1950, GRO 133/1951, (East side vide Dkt 3005/1980)
Clarendon St (Pt TA 68)	X1480, L <sup>r</sup> 3056/1950, GRO 94/1951
Morney St	X1459, Tr 1738825
Tavistock St	Rack 598, X1449, L <sup>r</sup> 2586/1950, GRO 39/1951
Little Gilbert St	Rack 561 E
Topham St	Rack 561 F

76	Mobilong	10
2228	Munno Para	11
2009, 2010	Kondoparinga	12

## Completion Tracing

These were diagrams showing data to be used for the issue of a Land Grant title. They were prepared following the completion of purchase agreements under the Crown Lands Act. The original records have been destroyed since the data can be found on the Land Grant.

An example of a reference to these tracings can be found on Diagram Book, Pichi Richi, Page 13.

### **Council Plans (also known as Local Government Plans)**

This series of withdrawn Council plans date from 1932 approximately, until 1992, when the Land Tenure Maps replaced them. The plans depict the legal boundaries (shown with the extent of the defined boundaries and government gazette dates) of the individual Councils areas.

All available plans have been photographed and retained on aperture cards held by the Roads Unit. Enquiries should be directed to the Roads Unit. See [Contact details](#).

The original maps were filed in the Treasury Strong room Drawer reference No. 44 for Municipal Councils and Drawer No. 139 for District Councils. Once later versions or transparency with overlays replaced the plans, the original plans were withdrawn, photographed and indexed in Drawer 222. These plans have been sent to archives (State Records reference GRS 6911/1).

The aperture cards are numbered in a 2200 series.

### **County Plans**

These plans are mainly of historical interest and date back to when Colonel Light was instructed to survey the surrounding districts using natural features to produce boundaries for Township and County purposes for settlement.

The first Counties were gazetted on 2/6/1842. The County of Adelaide was divided into Hundreds for settlement and gazetted 29/10/1846 pursuant to the provisions of Act 11 of 1846.

These plans have been sent to State Records (reference GRS 6910/1).

Some of these plans that covered areas outside of Hundreds were filed in Drawers. They were the only record of tenure for these areas and were current up to 1978. A list of these plans is shown below. Surveys of sections listed against Counties may be found in the Out of Hundreds G&C diagram book (i.e. look up the index for this book).

<b>County Plan</b>	<b>Reference Drawer Plan</b>	<b>County Plan</b>	<b>Reference Drawer Plan</b>

### Drawing Room (DR) Dockets

DR Dockets are now with State Records.

Dockets are indexed as follows:

- prior to 1936, GRG 35/245
- from 1936 to 1955, GRS 6737/1
- from 1955 to 1973, GRS 6737/2

The following dockets contain information concerning Permanent Survey Marks (PSM):

10/1949, 123/1954, 285/1956, 234/1957, 55/1963, 88/1963, 158/1966, 1/1968, 1/1969, 1/1970, 20/1970, 263/1970, 267/1970, 271/1970, 3/1971 and 1/1973

Any PSM Replacement plans are available in *SAILIS* (see [DR Docket Plans](#)).

### Education Perpetual leases and Educational lands

The *Education Act 1875* created a body called “The Council of Education”, the purpose of which was to establish the system of public schooling. In the same Act the following Section 24 was also enacted to provide for a method of raising funds for education purposes:

*“24. The Governor may reserve, dedicate, and grant to the Council any waste lands of the Crown as sites for school buildings, and may also grant to the Council by way of endowment for education one hundred thousand acres of the said waste lands, and may also from time to time grant by way of such endowment such further portions of the said waste lands not exceeding in area in any one year twenty thousand acres. The Council may demise and let any of the lands so granted by way of endowment, either from year to year or for any term not exceeding twenty-one years at the best rental which can be obtained for the same, and upon such terms and conditions as to the Council shall seem fit; and the annual income derived there from shall be paid into the Treasury, and applied by the Treasurer in manner directed by the Council towards the erection of school-houses, payment of salaries, and other expenditure in carrying out the provisions of this Act.”*

The Governor under the authority of this section granted large areas of land in the hundreds of Andrews, Appila, Ayers, Benara, Binnum, Black Rock Plain, Bundaleer, Crystal Brook, Mannanarie, Narridy, Penola, Pirie, Reynolds, Robertson, Tatiara, Wandearah, Willochra, Wirrega and Yackamoorundie (gazette notice 9 December 1875) and in the hundreds of Anne, Barunga, Belvidere, Boucaut, Bremer, Caroline, Everard, Goyder, Hanson, Jessie Light, Yackamoorundie, Tarcowie, Terowie and Tungkillo (gazette 16 March 1876) to the Council which then divided the areas and entered into lease arrangements with landholders for farming on a broadacre basis. These leases were registered as RPA instruments on the respective Land Grant held by the Council.

In 1878 Royal Assent was given to “The Education Amendment Act, 1878” The Council of Education was dissolved “*and all duties or obligations which by “The Education Act, 1875,” or the “Education Act Amendment Act, 1877,” are imposed upon the Council, and all powers, rights, privileges, and authorities which by the said Acts are conferred upon, or may be exercised by, the Council, shall hereafter be performed, had, and exercised by such Member of the Executive Council as for the time being shall have control over the Education Department, and such Member of the Executive Council, and his successors, shall be for the purposes of the said Acts, and of this Act, a body politic and corporate under the name or title of the “Minister controlling Education.” ...*” (Section 1)

The creation of the Ministry did not affect the administration of the endowed lands as Section 8 of the Act informs:

*“8. Notwithstanding anything contained in the 24<sup>th</sup> section of the Education Act, 1875, the annual income derivable from the lands granted for endowment under the provisions of such section shall be applied by the Treasurer towards the erection of schoolhouses, payment of salaries, and other expenditure in carrying out the provisions of the said Act, but so that no such moneys shall be expended without the sanction of Parliament.”*

In 1881 The Educational Lands Act was passed “to consolidate and amend the Laws relating to the Dedication and Leasing of Lands granted for Educational Purposes”. The abovementioned Section 8 of the 1875 Act was repealed and the Commissioner of Crown Lands was given an additional title as “The Commissioner of Educational Lands”. Section 4 of the Act vested the endowed lands viz:

*“4. Notwithstanding anything contained in section 1 of “The Education Act Amendment Act, 1878.” All lands heretofore granted by way of endowment for education, under the authority of section 24 of “The Education Act, 1875,” shall, immediately upon the passing of this Act, become, and shall thereafter remain, vested in the Commissioner of Educational Lands (hereinafter called “the Commissioner”), subject, nevertheless, to all leases, licences, contracts, and agreements heretofore lawfully granted or entered into in respect of such lands.”*

Section 39 of The Crown Lands Amendment Act, 1893 stated: “39. Section 24 of “The Education Act, 1875,” is hereby repealed and all lands heretofore granted to the Minister Controlling Education pursuant to the said section, or granted, reserved, or dedicated by way of endowment for education, shall revert to Her Majesty, subject to any existing leases, and such lands shall henceforth be let on perpetual lease, and dealt with under the provisions of this Act: Provided that nothing in this section shall alter the purpose for which any land shall have been reserved, dedicated, or granted pursuant to the said section, or affect the, application of the income thereof.”

The future of the educational lands was dealt with under sections 82 and 83 of the Crown Lands Act of 1903. Section 82 repeated, with one amendment, the wording of Section 39 of the 1893 Act.

*“82. Section 24 of “The Education Act, 1875,” is hereby repealed, as from the twenty-third day of December, one thousand eight hundred and ninety-three, and all lands heretofore granted to the Minister Controlling Education pursuant to the said section, or granted, reserved, or dedicated by way of endowment for education, shall revert to Her Majesty, subject to any existing leases, and such lands shall henceforth be let on perpetual lease, and dealt with under the provisions of this Act: Provided that nothing in this section shall alter the purpose for which any land shall have been reserved, dedicated, or granted pursuant to the said section, or affect the, application of the income thereof.”*

*“83. All leases of lands vested in the Commissioner of Educational Lands, from and after the eighth day of December, one thousand eight hundred and eighty-eight, shall be perpetual leases or agreements. All such lands which have not heretofore been dealt with shall hereafter be dealt with by the Board under Part V of this Act.”*

Section 82 of the 1903 Act was repealed by section 5 of The Crown Lands Further Amendment Act 1906 the effect of which was to treat all Education Perpetual leases the same as leases allotted under the provisions of the Crown Lands Act despite the fact that the majority of them are actually leases of freehold lands and registered as such.

Compiled by John Ramsay

### Electoral Plans

These are published Electoral maps (lithographs), dated approximately 1940's, showing the extent of the electoral areas in South Australia.

The plans have been archived with State Records (Reference GRS 6909/1).

### Exploration Plans

These are maps published by the Surveyor-General showing the extent of Exploration under taken from 1842 to the 1870's. Some include Sturt's 1842 and Elder's expeditions.

The plans have been archived with State Records (Reference GRS 8909/1).

### Field Books – Crown Survey and Pastoral

Most Field Books (FB) referenced on Crown land surveys (e.g. [Diagram Book Pages](#)) and Pastoral field books are available free of charge in *SAILIS*. A small number of these books have been lost; Survey Operations can confirm the books that no longer exist. See [Contact details](#). The original field books are filed with State Records. Survey Operations also holds an index book listing the date of issue and the Surveyor that the book was issued to.

### G & C Books

These are surveys in Out of Hundreds G & C Diagram Books that defined the extent of Grazing and Cultivation leases. These leases were a forerunner to Miscellaneous Leases and were discontinued in the 1890's. All of the blocks in these books have since been renumbered.

Images of these surveys are available in *SAILIS* under the Diagram Book name OUT OF HUNDREDS G&C.

### Issue Books

These contain small diagrams of land grant data and data for fencing purposes issued by the Surveyor-General. All enquiries should be directed to State Records. See [Contact details](#).

The diagrams can be found by:

1. look up the reference to the Hundred on the mounted list of Hundred names. E.g. Adelaide is 1.1, which refers to the brown index book 1, commencing on page 1
2. look up the section number in the index book. Any Issues will be recorded as a diagram number and date issued e.g. 379 / 23.7.99
3. search the Issue book that covers the date (e.g. 1898 – 1899 for the example above) for the diagram number e.g. 379

The Hundred index, 6 Index Books and 44 'Diagram Tracing' or Issue Books have now been sent to State Records (reference GRS 6913/1).

### Land Office Plans

See [Public Maps](#).

### Levels Book

'Levels Book' contained topographic surveys of sections and was not found in 2015.

## Limited Surveys

These plans are filed with the small diagram book originals in a drawer labelled 'Limited Surveys' at the Netley Repository. An example reference can be found on page 7 in the Hundred of Forrest diagram book.

These are not related to limited surveys referred to in Cadastral Survey Guidelines section 4.8c.

## Lithographs

A set of lithographs covering various subjects:

- Star positions South Pole
- Star positions Adelaide
- Stuart, Eyre Explorations 1842
- Plan of Colonel Light's Adelaide
- Sale plan of Adelaide showing original owners
- Adelaide Settlement Districts
- State Water Supply
- Transport Facilities
- Utilisation Plan
- Magnetic Declination in South Australia 1872

These plans have been archived with State Records (Reference GRS 6968/1).

## Nautical Plans

Published nautical or maritime maps (lithographs) showing the extent of the water depths in the Harbour areas utilised for shipping in South Australia.

The plans have been archived with State Records (Reference GRS 6914/1).

Marino Bay	1880

### Observation Books

The Observation Books, which are the original Trig surveys of the State, are with Survey Operations. See [Contact details](#).

### Originals Books

Original Books are clean copies of Diagram Book Pages prepared in 1934. An index to the contents is shown below.

#### Volume 1

Hundred	Pages
Barwell	1
Addison	12 to 30
Beamma	3 to 8
Berri IA	56A, 95A, 118A, 124A, 125A, 126A, 127A, 130A, 138,139,140 to 144, 146 to 149,151 to 153, 155, 156A, 159, 160, 162, 164, 168, 168A, 168A1, 169, 171, 171A, 178, 179, 180, 183, 183A, 184, 186, 187, 188, 190, 191, 192A, 193, 194, 195, 196, 197, 199, 200, 200A, 201, 202, 203, 204, 207 to 211, 213, 214, 217 to 219, 221, 222

#### Volume 2

Hundred	Pages
Berri IA	223 to 226, 229 to 232, 234 to 235, 237 to 240, 254, 261, 263, 267 to 275, 278
Bonython	31 to 39
Boonerdo	1 to 19
Buckleboo	1 to 56
Campoona	13 to 38

---

## Survey Searching Guide

---

### Volume 3

Hundred	Pages
Carcuma	1 to 14
Caralue	1 to 24
Chaffey IA	1 to 26
Karlowan Div	1 to 4
Cobdogla IA	10 to 70

### Volume 4

Hundred	Pages
Pordia	1 to 27
Pureba	1 to 5
Ulyerra	2 to 28
Wilcherry	1 to 5
Yalanda	4 to 7

### Volume 5

Hundred	Pages
Cunyarie	1 to 25
Daly	1 to 26
Duncan	8 to 39
Geegeela	15, 16
Gosse (561)	1 to 7, 10 to 26
Heggaton	3 to 9
Hill	1 to 7
Katarapko	2 to 7
Koongawa	1 to 8, 52

### Volume 6

Hundred	Pages
Laffer	1 to 13
Loveday	1 to 45, 46 to 48
McDonald	6
McIntosh	1 to 6
Mobilong	150A
Moorkitabie	1A, 2 to 10
Murlong	1 to 6
Nicholls	1 to 9
Oconnor	1 to 20
Out of Hundreds	33 to 34, 88, 89 to 93

### Volume 7

Hundred	Pages
Panitya	1
Peachna	5 to 26
Pethick	1 to 16
Pildappa	1 to 14
Pinbong	1 to 16
Pinkawillinie	1 to 26

## **Pastoral Plan Books**

The Pastoral Lease records consist of a number of books indexed to a card system kept in the self-help area, level 9, LSSA. The card system contains alphabetic listings of names linked to another index of Pastoral Lease numbers. The Pastoral Lease number index contains references to the books. All enquiries should be directed to LSSA customer support. See [Contact details](#).

Microfilm aperture cards are available for viewing the following records:

- 1851 Pastoral Lease Diagrams Vol. 1 to 6.
- 1888 Pastoral Lease Field Diagrams pages 1 to 599
- Pastoral Surveys Books 1 to 5
- 1888 Lease Boundary Improvements pages 1 to 77
- 1888 Lease Boundary Improvements with Valuations to page 96
- Pastoral Lease Office Plans to page 64
- Start Runs, Fixings Vol. 2

These books contain diagrams of Pastoral Lease boundaries. They are linked to [Pastoral Field Books](#) which contain the actual surveys. Many of these are compass traverses with limited accuracy.

The following books are with the Land Tenure Unit. See [Contact details](#):

<b>No. Books</b>	<b>Label</b>
13	1888 Pastoral Lease Field Diagrams
2	Pastoral Lease Office Plans
6	1851 Pastoral Lease Diagrams
2	1888 Lease Boundary Improvements with Valuations
1	Pastoral Field Traverses
1	Start Points of runs & fixings
5	Pastoral Survey Diagram Book
1	A.T. Woods Surveys
10	Data for surveys of runs (books 1, 2, 2A, 3 to 9)
2	1888 Lease Boundary Improvements
6	Amounts Paid Books (maps of Pastoral Leases with annotations)

High quality colour digital images are held by the Land Tenure Unit. See [Contact details](#).

The Pastoral field books are filed with the other Crown survey field books in the Office of the Surveyor-General storeroom.

## **Plots**

These are a similar record to Issue books (not to be confused with LTO Plots) that are occasionally referred to on [Diagram Book Pages](#). They were prepared from adjoining survey information to show boundary data and areas for sections and reserves. E.g. Plot 309 shows data for an Institute Reserve adjacent Sections 89 and 90 in the Hundred of Noarlunga.

The plots are now archived in State Records (Reference GRS 6907/1).

### Private Town Books

These books contain diagrams of some non-government towns. This information is mostly duplicated on General Registry Office (GRO) Plans.

There are 4 Private Towns Books filed with State Records. See [Contact details](#).

### Public Maps

These are coloured maps that were the authority for tenure and Crown Land parcel identifiers until they were deregulated in 1988. In some cases they provide the only evidence of Government (Public) Roads. A set of clear (no colour) Hundred maps showing Section numbers prior to re-identification as other parcel types are available in *SAILIS* by selecting the Hundred name in the list of Diagram Books and typing 1M (case sensitive) instead of a page number.

Withdrawn Public Maps (labelled Superseded Land Tenure Maps) are available on microfilm aperture cards in the LSSA customer support area, and are filed in Public Map number order. See [Contact details](#). A record of all of the public maps (HISTMAP), including the microfilm numbers, is also available through LSSA customer support.

High quality colour digital images are held by the Land Tenure Unit. See [Contact details](#). Also, see [Public Map Codes](#).

### Railway Plans

References to Railway Plans or Tracings are occasionally found on Diagram Book Pages (e.g. *RLY PLAN 54/7* on DBP. 63, Strathalbyn). These originally referred to Drawer Plans that were kept by the Surveyor-General but were later handed over to the South Australian Railways. They have since been archived and are available for viewing at State Records. Survey Operations ([Contact Details](#)) have an index to the Railway Plans and can supply the appropriate plan numbers to request from State Records. Some information is available for the Broken Hill to Peterborough railway on microfilm cards. These cards are labelled 'Petersburg & N.S.Wales – Contract Plan', and are filed with the Road Plan microfilm cards in the Roads Unit. See [Contact details](#).

Where the railway crosses freehold land, there is usually no point in looking for them, since the boundary data is recorded in transfers and Certificates of Title.

### Search Books

Search Books are a set of old Lands Department books containing prints of Highways Department road acquisition data. There is no survey information (e.g. marks, occupation etc) and in most cases the information is duplicated in transfer documents lodged in the LTO. These books can be accessed through LSSA customer support. See [Contact details](#). See Section 2 for other [search book](#) references.

## Section 4 Permanent Survey Mark (PSM) Records

Enquiries beyond the following should be directed to Survey Operations. See [Contact details](#).

### Survey Mark Locality Plans

These are sketches showing the physical location of Permanent Survey Marks (PSMs) and are available in *SAILIS* free of charge. The images are found using the mark number e.g. 6628/12345 is entered as 662812345. Other information about these marks can be found via the Survey Mark Search in *SAILIS*.

The originals are filed with Survey Operations. See [Contact details](#).

### PM Tracings

These are plans showing the location of Permanent Survey Marks. PM Tracings from 1861 onwards should be available in *SAILIS* and are a mixture of Crown Land surveys filed for information purposes, surveys not proceeded with, Commonwealth surveys for information purposes and PSM relocations.

References to these plans can be found via the *Survey Mark Search* where the plan type is prefixed with 'A' (e.g. PSM Tracing 1234 is A1234).

The originals are filed at the Netley facility. The large ones are in a Verti-Plan cabinet and the small ones are filed with the small Diagram Book tracings. A backup set of Microfilm aperture cards are kept in the self-help area, level 9, LSSA.

From the 1930s to the 1960s surveys lodged in the Lands Titles Office (LTO) that placed PMs were also given Lands Department PM Tracing A, B & C numbers (different to LTO A, B & C numbers) or Drawer plan numbers. The Lands Department A, B & C numbers refer to the A, B or C book containing cross references to docket numbers or LTO plans.

e.g. DBP 105 Willunga has a note 'Vide PM Tr. B 1219'. This refers to Book B, tracing 1219 which is cross referenced to docket 4278/60, which when cross referenced in *SAILIS* gives LTO C 1108.

Survey Operations (see [Contact details](#)) has the PM Tracing books that cross reference PM Tracing numbers and docket numbers, which are used to obtain an LTO plan reference.

### Traverse Diagrams

These diagrams show the traverse lines, Traverse Pages and mark numbers used in network surveys. Microfilm aperture cards are available in the LSSA customer support area. See [Contact details](#)

### Traverse Pages

These contain a record of the field observations carried out during network surveys. Microfilm aperture cards are available in the LSSA customer support area. See [Contact details](#)

The originals are filed with Survey Operations. See [Contact details](#).

**Geodetic Records**

Copies of these records are kept on Microfilm cartridges, filed in the LSSA customer support area. See [Contact details](#)

Original records are stored with Survey Operations.

The following is a summary of the records available:

<b>Name of Record</b>	<b>Description</b>
Field Page References	index to geodetic records
Level Pages	field notes for levelling runs
Bench Mark Summaries	Bench Mark photos and sketches
Trig Station Summaries	Trig Station information
Field Photos	photographs showing the location of mapping points
Angle Pages	angle observations for mapping control
Location Diagram Pages	location sketches for survey marks
Level Reduction Pages	calculations of elevations from level pages
EDM Pages	distance measurements for geodetic control
Job Files	summary of geodetic records for each job
Computer Output Files	final computer reductions for geodetic control jobs
Ferranti Computations	
Navy Triangulation SA	
Peg Files and Indices	index to early Geodetic Records

## Section 5 Map Codes

### Diagram Book Codes

Survey Mark Search uses Diagram Book Codes based on an historical code (LOTS system code) for the Hundred name. For example, H105600P3 is the code for page 3 in the Onkaparinga book, where 105600 is the code for the Hundred of Onkaparinga.

See [Public Map codes](#) for a complete listing of Hundred names, codes and Public Map numbers.

In all but three exceptions, the page number follows the code. The three exceptions are Out of Hundreds South (OHS), the Roads Book (RB) and the Mineral Claims Book (MIN) where the code is followed by 'V', the volume number, 'P' and the page number e.g. OHSV1P20.

*Out of Hundreds North* pages are referenced as 'OHNP' followed by the page number in *Hundred/Parcel, Plan Image Search* within *SAILIS*. In the *Survey Mark Search* they are referenced using the Hundred code for the pastoral or 250,000 scale maps e.g. H833800P861 for page 861 located in Out Of Hundreds (Andamooka).

The following table shows the codes for Diagram Books that are not labelled with a Hundred name:

AERP	AERIAL PHOTO
AP	BOOK A
APLP	ADELAIDE AND PARKLANDS
BP	BOOK B
CP	BOOK C
DBP	BOOK D
EBP	BOOK E
EGWP	ENCOUNTER BAY, GOOLWA & WAITPINGA BOUNDARIES
GCP	GOLD CLAIMS
GTP	GOVT TOWNS
ISP	ISLANDS
K	HD BOUNDARIES
KARLP	KARLOWAN
MISCP	MISCELLANEOUS BOOK
MV	MINERAL CLAIMS
OHGCP	OUT OF HUNDREDS G&C
OHNP	OUT OF HUNDREDS NTH
OHSV	OUT OF HUNDREDS STH
OSP	OCCUPATION SURVEYS
RB	ROADS BOOK
UNILP	UNIVERSITY LANDS

**Public Map Codes**

These codes are used in *Survey Plan Details* to identify parcels where the land description includes a Hundred name. Allotments in Government Towns are identified using similar codes with the last two numbers changed, e.g. the code for Alawoona (in the Hundred of Allen) is 710101.

## Section 6            Miscellaneous Records

The following miscellaneous records have been kept for historical searching. The books listed below can be accessed through LSSA customer support. See [Contact details](#).

- Railway, Drainage and Index to Parliamentary Plans
- Topographic Sketches Index

Data for Survey of Mineral Claims, Forest Reserve Plans and Village Settlement Districts were previously kept, but could not be found in 2015.

### **City of Adelaide – Register of Public Streets**

The City of Adelaide Register of Public Streets (KNet #9843270) dates back to 1845 and contains in alphabetical order a register of Public Streets within the City of Adelaide. It tables such information as width from Building Line to Building Line distances, widths of roadway, water-table, footpath and other comments.

Government Gazette of 26 September 1850, page 555 (KNet #9843344) also contains widths of carriage and foot-ways for some streets in the City of Adelaide.

Contact Survey Operations for details. See [Contact details](#).

### **Cummins Kensington & Norwood Alignment**

A copy of the Cummins Kensington and Norwood alignment field notes is available in *SAILIS* by searching *Miscellaneous Survey Records* as the plan image type and entering 'NORWOODALI' for the first 99 sheets or 'NORWOODALI-2' for the remaining sheets in the plan order field.
